the cultivation of our other staples. But
now an enterprising gentleman, living in the I MOTT SMITH Minister of the Interior. now an enterprising gentleman, living in the heart of the world-renowned coffee-growing I'r has present His Majorir the King to appoint the district of Konn, on the Island of Hawaii, Mr. sers, is accordance with H. N. Greenwell, has issued a circular ada read to parties desirous of engaging in the H E H W. F Labels &n. W. H. Cascle, C. E. Bishop, cultivation of coffice either on a large or small scale, in which he states that he is ready either to assist with land and capital in the fermation of a coffee company, or to treat with such as may wish to go into coffee culture in a small way. The circular is accompanied with the following "prospectus for the formation of a coffee plantation in South Kona, Hawaii :"

The proposed site is located in the District of South Kona, Hawaii, at a distance from the sea coast of about four (4) miles, and is of easy across by road from the beach, off which at a quarter of

a mile there is good anchorage.

The hand lies on a gentle incline, at an elevation of from 2000 to 2000 feet above the sea; the soil is formed from the decomposition of law rock and askes, and vegetable matter, is light and easily ashes, and vegetable matter, is light and easily worked, and is now covered by a growth of fero, grass and vines, with scattered kos, ohis, opiku and other trees

and other trees.

It is proposed to form a Company with a capital of \$25,000, to be allotted in twenty-five shares of \$1,000 each. The owner of the hand will give four hundred (400) acres, which shall be valued at \$15 to a new contract and the little little little. per sere, and shall entitle him to six (6) shares. shall be regarded as having fully paid up for the sald aix shares. said air ahares.

The management shall be in the hands of a Board of Directors, to be elected by the Shureholders.

As many thousands of young plants, of sufficient size for transplantating, can now be bought at a low figure in the district, it will be unnecessary to form any nursery, and a considerable saving of time will thus be made in starting the enterprise. It is calculated that the expenses of the first three years would be as follows, viz:

Necessary buildings. \$ 2,000
Pay of Overson for three years at \$1000 per snown 2,000
Pay of twenty men at \$100 such 10,500 10,500 1,000 2,200

At the end of the second year there would be a small yield, and at the end of the third year the trees would give a foil crop.

The trees should be planted nearly eight (S) feet apart, say 700 plants to the acre, and should yield a return of 1600 lbs. of merchantable Coffee per sanum this at present prices (19 cents, per lb.) would be worth \$100 per acre, or for a Plantation of 100 acres \$19,000.

The expenses thereafter should not exceed per

7,200 1,900

Leaving a balance of \$8,230 per annum, or a little over 32 per cent, on the paid up capital. The plantation might be extended to 150 or 200

As Mr. Greenwell has had long experience in the business his figures and calculations may be relied upon as perfectly trustworthy. Indeed, his estimate of yield per acre we think is too low, as two pounds of coffee to the tree is an average yield, while three and four pounds is by no means uncommon. We wish the enterprise every success.

Despatches received here to-day, from Govern or Chamberiain, dated at midnight, say he will be inaugurated at moon to-day, and that no trouble is likely to occur. The Republican members who joined the Wallace organization are ready and willing to return to the House presided over by Mackey as soon as Chamberlain.

gion over to Tilden. [Communicated.] Cane Trash for Fuel.

Irawics, Escland, Oct. 26, 1876. Sin .- We have read with much interest the letter

of five cents a pound was demanded and paid at Vienna in 1873, and was especially adapted for to travel. burning straw in portable and fixed steam engines, low a copy of the protest and appeal made by which were intended for use in Russia, Hungary, the California Sugar Refinery, also of a state- Roumania and other countries where coal is not inment signed by the principal commission digenous and wood is scarce and in some parts not to

These engines enabled the farmers and small manufacturers to use steam power generated from fuel which cost them almost nothing, and which was always at hand, and to such an extent has this boon the Treasury department in Washington will | beer appreciated that nearly 400 engines of different set saide the decision of the Custom House sizes have been manufactured on this patent since officials, but if the latter should be sustained 1873 and an average saving of from £1 10s 04 to Hesides being used for burning straw, these furnaces have been successfully employed for burning reeds,

maize stulks, and brush wood, and many engines built on this patent are at work in Egypt, using nothing but cotton stalks as fael, producing a great In all the patent furnaces constructed to burn the above named regetable products the theoretical prin-ciple adopted has been to hold the matter to be burned in suspension in the furnance, allowing it to float lightly over the burning ashes, thus permitting suffi-cient space for the circulation of the air necessary for free combustion, at the same time the half burn-

We fear to take up too much of your valuable space with a general description of the mechanical arrangement of the apparatus, and have therefore coclosed you a pamphet describing the invention. and containing accounts of various scientific trial and experiments which have taken place with it in England and abroad, from which you can extract whatever you think will be most interesting to your

readires.

Our patent has been successfully tested with eans trash in Egypt in the presence of his lighness the Khedive by one of our partners, and we enclose a drawing of a design for adapting the patent to the furnaces of the large boilers of the factories to His

In this apparatus the cane trash, which is first partially dried in the sun, is placed in an inclined iron frough, one end of which is fixed to the frame earrying the two toothed rollers, which is attached to the cast iron furcance front. The cane trash falls by its own gravity to the rollers which deliver it to the furnance mouth and pass it on to an inclined dead plate immediately under the furnance mouth. This serves as a distribution for the fuel before it reaches the grate bars, which are also inclined and with wider air spaces than for c at or wood. A me-chinical priker acting on the whole grate at the same time is sometimes employed for keeping the air

same time is sometimes employed. For keeping the air spaces free from silicious deposits.

When a good fire has been usade up in the grate a thin stream of fresh came trask is continuously injected into the furnisce by means of the rollers which may ofther be turned by hand or steam power, and the unconsumed fael gradually forces the half burnt and burnt came trask towards the end of the furnace where the greatest amount of combustion takes also. takes place.

One great advantage of this apparatus is that in-stead of throwing the feel on to the top of the fire, as has hitherto been the custom, in which case all as has atthere been the custom, in which care all vegetable substances act as a sort of damper, our patent arrangement forces the fresh came trash into the centre of the coldest part of the burning mass, thus supplying the fire with fuel without checking the evolution of the gases produced by combustion in the middle and and of the fornance, at the same time the whole mass is kept in a state of slight and continual motion which is as necessary to the reconstructional motion which is as necessary to the reconstructional tinual motion which is as necessary to the prop

tinual motion which is as necessary to the proper combustion of vegetable substances as the jerking movement of a fermor's pitchfork is to the proper preparation of a manure heap.

We hope you will pardon the length of our letter and if any of your readers would like further information upon the combustion of vegetable substances and cane trush and will send us drawings of their hollers we shall be happy to adapt our invention to their special requirements. tion to their special requirements.

Yours obediently
RANSONES, SINS & HEAD.

[We would add that we have received in connecion with the above letter a number of catalogues. and also plans in which the apparatus is fully illustrated, all of we shall be happy to exhibit to any who feel interest in this subject. Ep. |

Burning of the Brooklyn Theatre-Terrible Punic.

New York, December 5 .- The Brooklyn Theatre was burned this evening, the fire originating during as provided for in the schedule to article I under the Convention between the United States of America and His Majesty the King of the Hawaiian Islands (commercial reciprocity), concluded January 30, 1875, and the Act of Congress to carry into effect said Convention approved August 15, 1876, and the proclamation of the President of the United States to enforce said treaty dated at the City of Washington the 9th day of Sept., 1876, because:

First.—That said sugar is the growth, production or magnificature of the Hawaiian Islands, and was imported directly from said telands.

The fire in the Brooklyn Theatre last night was at the Congress to carry into the United States to enforce said treaty dated at the City of Washington the 9th day of Sept., 1876, because:

First.—That said sugar is the growth, production or magnificature of the Hawaiian Islands, and was imported directly from said telands.

The fire in the Brooklyn Theatre last night was at. the performance of the "Two Orphans." The panie

or massifiacture of the Hawsiian Islands, and was imported directly from said islands.

Second.—That said sugar is unrefined sugar, maining thereby the grades of sugars heretofore commonly imported from the Hawsiian Islands, and now known in the markets of San Francisco and Portland as "Sandwich Island Sugar."

Third.—That said sugar is not the "refined loaf, loung, crushed, powdered or graunitated sugars." the only refined sugar specially enumerated in the Statute. The term refined sugars, as used to the law, has been defined by the Supreme Court of the United States, in the case of Barlow claimant of S5 hds, sugar appellants vs, the United States, to be exclusively limited to such as have assumed at some time the form of "white reduced, loaf or lump sugars." See article 75% Treasury Registration, 1873. In reference to the classification of substances and the terms used in the tariff, Andrews on the Revenue Law at page 181, paragraph 163, says: It may be asserted as a general principle, that tariff laws are to be construed according to the commercial meaning of the terms used in them, (Lee w. Luccion, lat Story, 610), and st page 183, paragraph 169, he says "" The duty laws is to raise revenue, and for this purpose to class substances according to the general usage and known denominations of trade, "whether a particular article were designated by one name or another in the country of its origin, or whether it were a simple or mixed substance, was of no importance in the view of the legislature. "" It applied its intention to the description of articles as they derive their appeliations in our own markets, in our domestic as well as our foreign traffic, (9th Whenton, 437, 439.

That fariff laws are to be construed according to the commercial meaning of the terms used in them and substances classed according to the known denominations of trade, are principles of revenue; and the series are fined to the terms used in them and substances according to the same of the legislature. "" It applied its leteration to the description of articles as they derive their appeliations in our own markets, in our domestic as well as our foreign traffic, (9th Whenton, 437, 439.

That fariff laws are to be construed according to the terms used in them and substances classed according to the known denominations of trade, are principles of revenue; and the proper still define the proper still define the proper states and the proper still denominated, and these were all bruised, bleeding and main been nothing more serious to record than the destruction of the property. The house was about two-thirds fall, and those below were sitting well forward towards the stage. For those in the family oircle, which they had been precipitated by the falling of the burning floors. At the police station adjoinin the names of 86 persons missing from their home
